MTL 2.5

Modeling to Learn

Test. Don't guess.

MTL objectives include activities and competencies that...

1. Are meaningful for you and align your learning goals with your team.
2. Develop systems thinking skills to help you see how several things fit together, & understand causes hard to see without data & modeling resources.
3. Make VA data, initiatives, and standards transparent to you.
4. Empower you to realize ongoing improvements in team quality of care & work life.

Select Clinics to Generate Report Data

Clinic Name -> Providers

- ☐ Search
- ☐ 3A TPSY
- ☐ 3RU
- ☐ 5 E I

Search: Type in a selection you are looking for.

Clear Selections: Click on the eraser icon to clear your selections.

Clinic Selection: Filter through the light blue and dark blue columns to narrow down clinics in the green column and then select and click "Apply" to generate your team's data.

Viz & Data tabs:

Click on to explore through tabs different visualizations, counts, and data on individual patient information (**contains PHI**).

Team Data tabs: Click to explore and produce and view descriptive team data to use in the Simulation User Interface.

Check Filters: Check if any filters are affecting your data and/or visual.

Focus Mode: Click to zoom in on the tab.

Filters Panel: Use this panel in the **data tabs** to narrow down individual patient information. **Click on a column in the data tab first to see filtering options in the panel.**

Note: Viz tabs have an additional filter built into the graphs for extra filter options (e.g. VVC filter in vizEnc).
